

Amendments to the Specification:

Please amend the paragraph beginning on page 14, line 8, as follows:

The annular ring or wall 31 has a diameter of sufficient size to fit snugly in holder 10. Ring 31 further has a tapered portion 41 that is tapered toward the longitudinal axis of agitator 30. Ring 31 also has an outward protruding bead 40 that runs along the upper outer circumference of ring 31. The bead 40 is adapted to rest tightly against lip 26 to securely hold liner 25 in position against rim 12.
